### Discussion

Trailers 771F, J, K, L and T have been vacated and are destined for demolition within the next few months. The *Reconnaissance Level Characterization Report (RLCR) Supplement, 771 Annex, Stack and Outbuildings, Building 771 Closure Project, Revision 2* was approved on July 12, 2001. These trailers were included in the RLCR as Type 1 facilities. Given these facilities remained in use following the radiological surveys provided in the RLCR, CDPHE's concurrence letter requires additional radiological survey data be provided, as necessary, prior to closure/demolition. Ms. Onyskiw concurred that these trailers can be demolished following the completion and transmittal of verification surveys.

Trailers U and V will be released back to the vendor by means of a Property Release Evaluation (PRE). The PRE has been provided to Ms. Onyskiw.

A verification survey has been performed for trailers Q and R, however, these trailers are being relocated to Building 707/776/777 for reuse. As a result, additional verification surveys will be provided to CDPHE once these trailers are no longer needed and are destined for demolition or removal from the Site.
